

News Tracking Application

There are multiple news-sharing apps used by a single user and are often spammed with notifications. There is also a lot of fake news which gets shared. A news-sharing app wants to help users find relevant and important news easily every day and also understand explicitly that the news is not fake but from proper sources. Creating an app that benefits with the smart news filtering functionality where it allows its users to segregate various news sections, comprising of business, sports, political, international, and more. The users can opt for filters like Breaking News, Most Popular, and more.

What does the problem affect?	With draw of news reading.
What does the issue occur?	Because of the lack of news reading people can't know what's happening around the world.
Where is the issue occurring?	People did not spend the enough time to read the news.
Why is it important that we fix the problem?	We need to fix this problem so that app will give the users relevant news only to save their time.
